

FML List WIA in short

- **Personal functioning (persoonlijk functioneren).** The insurance doctor may ask you questions about for example problems with your concentration, memory or attention.
- **Social functioning (sociaal functioneren).** The insurance doctor asks you questions about your view, hearing, speaking, working together with other people and dealing with your feelings and emotions.
- **Adaptation to physical demands of the environment (aanpassing aan fysieke omgevingseisen).** This means for example noise, temperature, vibrations.
- **Acting dynamically (dynamisch handelen).** This is about walking, standing and bending. How far can you reach, how often? How many kilos can you lift, pull or push?
- **All sorts of static postures (allerlei statische houdingen).** For example: how long can you stand or sit?
- **Working hours (werktijden).** This is about how many hours you are able to work per week and if you can work in the evening or during the night.
